BUSINESS OVERVIEW

ASV Contractors specialise in building maintenance, refurbishments, fit-outs, extensions, remedial repairs, upgrades, and heritage restoration services for government, commercial, and industrial clients. Our long-standing customer relationships are a testament to our extensive industry experience and commitment to quality and safety.

We have a strong record of completing projects within budget and timeframe and take pride in delivering quality work. Regardless of the complexities and constraints of the project, you can rely on our professional team to work closely and openly with you. By applying our specialist skills, we consistently strive to meet and exceed your expectations.

MISSION

To continue servicing our existing, long-standing clients based on our strong reputation as a trusted and experienced building contractor while developing new business. Keeping safety at the forefront, we are committed to consistently meeting our clients' requirements in alignment with their budget and timeframe.

VISION

To expand our team with experienced members, grow our network of highly qualified and professional sub-contractors, and establish strategic partnerships throughout NSW.

COMPANY VALUES

Customer Focused: Prioritising high-quality service and strong business relationships

Results Driven: Dedicated to achieving the best outcomes while focusing on safety

Detail-Oriented: Working meticulously and with precision to deliver project requirements

Honesty and Integrity: Always transparent, consistently striving to do the right thing for our clients

Innovation: Applying expertise and extensive industry knowledge, together with new technology, to provide our customers the optimal solution

Quality: Committed to best practices in safety, environmental and project management

SERVICES WE PROVIDE

- NSW Fair Trading Licenses in Carpentry, Painting and Decorating (License No. 252921C)
- Certificate III in Painting and Decorating
- Certificate III in Carpentry
- Certificate IV in Building and Construction
- Elevated Work Platform (EWP) License

TRACK RECORD

Project 1: Toongabbie Train Station

Client: Transport NSW

Scope of work: Project requirements included:

- Replace the station's roof structures
- Repair the structural steel of the station's platform canopies
- Provide exterior painting for the entire station

Budget: \$250,000+

Challenges: As a busy train station, our team required access to the platforms while ensuring minimal disruption to operations and daily train schedules. Maintaining the station's integrity as a heritage-listed building was also crucial.

How we overcame those challenges: A structured approach to project management enabled our team to:

- Proactively engage with our client and relevant stakeholders throughout the project planning phase
- Successfully prepare all aspects of the project while adhering to public safety guidelines
- Efficiently plan resources, including assigning traffic management specialists and heritage consultants
- Minimise disruption to the station's timetable services, by designating appropriate trades on specific days to carry out work promptly

Outcome/s for our client:

Following our client's requirements, we executed and delivered the project on time and within budget.

TRACK RECORD

Project 2: Edensor Street, Epping

Client: NSW Strata

Scope of work: The required maintenance work for this building complex included:

- Replacing all windows and sub-seals
- To re-concrete driveways
- Repair and repainting balconies

Budget: \$450,000

Challenges: Organising necessary access into respective units and balconies with owners, tenants, the strata team and tradespeople. During operations, ensuring safety for all occupants, with minimal disruption.

How we overcame those challenges: Our team carefully implemented the program in staggered phases which provided the residents:

- Suitable options for delivery to best suit schedules
- Assistance and support at each project stage through open and two-way communication with our team

Outcome/s for our client:

The project was completed seamlessly, with minimal impact on the residents.

Project 3: Oakhill Drive Public School

Client: NSW Department of Education

Scope of work: The requirements for this project included:

- Replacement of operatable walls
- Disabled bathroom refurbishments
- Comprehensive engineering solutions for the repair of structural cracking to the school's Block A demountable upgrades
- Internal and external painting of various buildings and offices

Budget: \$380,000

Challenges: It was vital to minimise disruption to the school's class timetable while maintaining the highest level of safety and protection for the staff and students.

How we overcame those challenges: With the children's safety as a top priority, we carefully planned:

- Isolation work zones, to minimise interference
- A project schedule assigning most of our work outside class time, including school holidays, after school and weekends

Outcome/s for our client:

Our team meticulously completed the project while delivering within the client's budget, and schedule, while adhering to their safety requirements.

TRACK RECORD

Project 4: Westfield Shopping Centre, Miranda

Client: Scentre Group

Scope of work: ASV Contractors were assigned for the major upgrade of the shopping centre's external façade.

Budget: \$1,000,000

Challenges: As a busy thoroughfare, our team effectively managed traffic in and around the shopping centre and maintained organised road closures. Following stringent safety guidelines, we considered and addressed the height restrictions and the project's proximity to public infrastructure, including the primary train line.

How we overcame those challenges: An effective project plan enabled our team to:

- Work in separate shifts minimising business impact on shop tenants and ease inconvenience for customers and the general public
- Engage traffic management specialists to organise isolated work zones and efficiently redirected traffic
- Adopt a combination of access methods to prioritise safety, including Elevated Work Platforms (EWP), swing stages, scaffolding, and rope access

Outcome/s for our client:

We completed the project on time and within budget while keeping the client's timeframe in mind.

WHS COMPLIANCE

At ASV Contractors, we prioritise a safe and healthy work environment. In obtaining our ISO 45001:2018 certification, our organisation prioritises safety in all aspects of our projects and operations.

We minimise and manage risk for our team, our clients, other trades on site, and the local community by implementing the following Health and Safety mitigants:

- Regularly reviewing and, where required, updating our Health and Safety policies and protocols to meet current industry standards and legislation
- Provide comprehensive work, health and safety training and manuals to all team members, and ensure teams ongoing understanding and commitment by providing regular in-house training
- Monitoring the safety and well-being of our team and stakeholders onsite, in our warehouse, and in other relevant areas with thorough audits
- Reviewing our policies and procedures annually; recalibrating the impacts of change on future business decisions that may be affected by health and safety consequences
- Conducting comprehensive WHS assessment before the commencement of each project to determine site safety requirements, including, but not limited to, emergency exits and evacuation areas
- Providing detailed, safe work statements for every project and distributing the information to all workers and relevant stakeholders onsite

ADDITIONAL INFORMATION

Environmental Management Policy

We are ISO14001:2015 certified for environmental sustainability and preservation. Every project is thoroughly assessed to identify potential issues and engage the appropriate specialist in achieving a successful outcome.

Quality Assurance

In obtaining ISO 9001:2015 certification, we have established efficient management processes to meet our customers' requirements. Our team conducts systemic internal audits and management reviews, adapting a quality checklist based on customer and stakeholder specifications.

Graphic Area of Operation

ASV Contractors service the Greater Sydney area, including the CBD. We also cater to clients in the Blue Mountains region and extend our reach to the Mid-North Coast, Hunter region and Port Macquarie.

Community Involvement

As active community members, ASV Contractors supports charities and clubs in the local area, including the Red Dogs football team.

KEY TEAM MEMBERS

Amir Vojdani – Director

Amir is involved in all aspects of the company, from quote preparation to project delivery. His managerial responsibilities include implementing HR policies, overseeing the team's operations, and providing final approval on all projects. Amir is an experienced licensed builder who entered the building industry in 2003. His professional advice and consultation offer clients peace of mind, knowing that their project will be completed on time and on budget.

Soroush Vojdani – Director

The founder of ASV Contractors, Soroush, has been in the building industry for almost 30 years. His role involves contract management, project accounting, and supporting the company's internal management processes. In addition to providing sound advice for safety measures, Soroush helps clients achieve their desired outcomes through quality work.

George Mannah – Senior Site Manager/ Senior Project Manager

A fully qualified and licensed tradesman with over 20 years of experience in construction, George's responsibilities include client management and quoting, supervising suppliers and contractors, and overseeing costs and pricing for materials and trades required for each project. He proactively plans and schedules jobs to ensure projects are completed on time while conducting thorough quality control inspections and audits at every completed project stage. George builds strong customer relationships, delivering the optimal outcome for every project.

Juan Arango – Operations/IMS Manager

Juan's role entails office administration, operational and contract management. He also oversees our Internal Management Systems (IMS), including the safety, quality, and environmental management certifications. In his onsite supervision, Juan ensures every project adheres to all IMS requirements and is of the highest quality.

Golsa Vojdani – Project Manager

With over 10 years of industry experience, Golsa oversees the marketing and business development aspects of ASV Contractors while also supporting end-to-end project management. She is passionate about building the best team for the company to deliver quality results. Additionally, she is instrumental in strengthening relationships with customers. Golsa holds a Bachelor of Business and a Masters degree in Project Management.

CLIENT TESTIMONIALS

“ASV Contractors have always delivered projects on time and final outcomes have exceeded expectations. What has made them stand out is open and timely communication and the effort the team puts to building relationships with clients to make sure all requirements are met.”

**Asim Khan, Project Manager Delivery Infrastructure Customer Environment,
Transport for NSW**

“ASV Contractors consistently deliver a professional and reliable service and product. The team are dedicated to meeting the needs and requirements of each project to our client’s satisfaction.”

Michael Vance, Director, Vance Consulting Services

“Our experience with ASV Contractors was marked by integrity, reliability and good quality outcomes. Because of the cooperation and professionalism of ASV Contractors, we were able to continue our business-as-usual activities while work was carried out. Our interactions commenced with a competitive quote and a willingness to meet requirements, including a tight schedule. We appreciated the manner in which the site was maintained and the pleasant, can-do attitude of the team...we recommend them strongly.”

Marcelle Elachi, Construction Manager, Concrete Structures Pty Ltd

We invite you to discuss your upcoming construction project,
maintenance requirements or refurbishment project.
